

## MECHANICAL SUPERVISOR - MANUFACTURING (M/W)

**Want to contribute to sustainable development and make a difference for the future? Want a challenge where you can express your problem-solving skills? Interested in gaining international experience and advance your career?**

**So, welcome to Interholco!**

Since 1962, Interholco (IHC) has been advancing its leadership in the sustainable management of forests.

With both its FSC certification and its values of technological excellence and human development; IHC produces and distributes, through its subsidiary IFO, logs, lumber and other finished wood products from Africa's forests, as well as several product lines from its trading department.

IFO (Industrie Forestière de Ouesso) responsibly manages a forest concession of around 1.1 million hectares in Congo Brazzaville and keeps on growing thanks to the commitment, expertise, and diversity of its 1'000 team members.

The Department of Industrial Maintenance is located on IFO's production site.

## YOUR MISSION

Reporting to the Industrial Maintenance Manager, you lead the mechanical maintenance teams for an optimum running of the production units.

You supervise a team of 21 members. You work closely and productively with the heads of department.

---

## YOUR IMPACT

- A decrease of the duration of stoppage of equipment, through constantly searching techniques and processes for improving production and proposing solutions.
- A conversion of waiting times for spares into an opportunity for finding and trying alternate solutions.

---

## YOUR RESPONSIBILITIES

- To program the mechanical maintenance teams, factoring production and the needs of equipment.
- Monitor all the operations of mechanical maintenance in the production units.
- Keep the line managers informed about any unexpected stoppage and the evolution of the state of equipment.
- Monitor the stock of spares, initiate the orders of spares, and track the status of orders.

---

## YOUR STRENGTHS AND KNOW-HOW

### Technical

- Knowledge of hydraulic and pneumatic actuation
- Experience in the daily mechanical maintenance of production units.
- Experience in mechanical transmission (chain, sprockets).
- Perfect mastery of spare parts.
- Knowledge of the wood industry (preferred).
- Experience of 3-5 years in a maintenance department role.

### Know how

- Flexible and pragmatic, managerial and organizational capacity.
- Able to learn, to work in a team as well as individually
- Proven experience in developing new techniques associated with maintenance of manufacturing equipment for improved efficiency.
- Problem solving skills as to identify and correct plant issues and deficiencies.

### Qualifications

Mechanical or Electrical diploma and/or superior training in industrial mechanical field.

---

### WHY JOIN US

- You experience a unique adventure enabling you to be a part of sustainable development and shape the future.
- You accelerate your professional growth by joining a multicultural, multidisciplinary team committed to building solutions.
- You receive a full compensation package, including benefits.

---
