Engineered to perform

INTERHOLCO supplies **finger-jointed, laminated scantlings in SUSTAINABLE HARDWOOD - MADE IN AFRICA.**

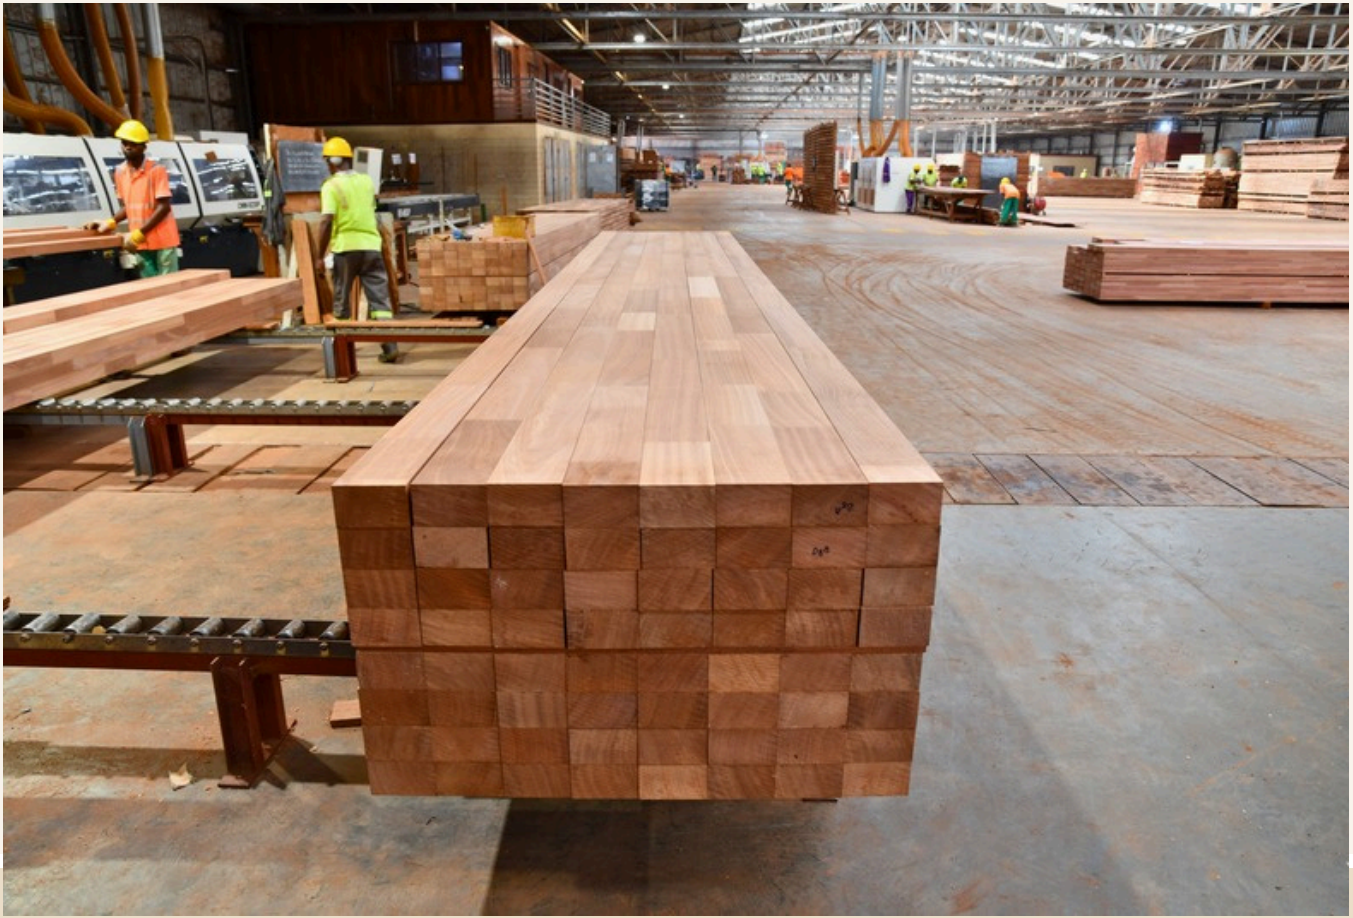

For **doors, windows** and other indoor and outdoor applications, our **KOMO- and CTB-LCA-certified manufacturing process** ensures **consistent quality** and **higher strength.**

Our products combine **advanced manufacturing** with **continuous quality control,** focusing on **dimensional stability, bond quality** and **consistent performance.**

IHC INTERHOLCO

ENGINEERED
TO PERFORM

Swiss precision, Made in Africa

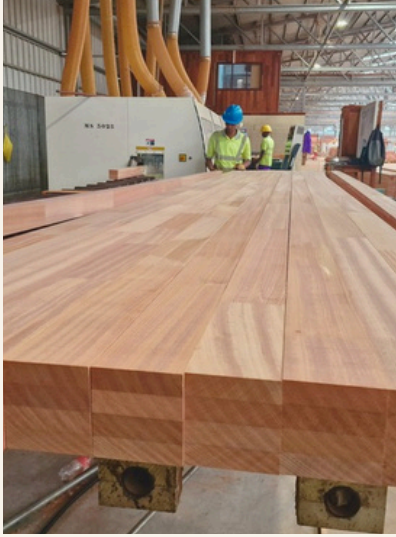

INTERHOLCO selects, harvests, processes and certifies premium hardwood from **a 1.16 million hectare natural tropical forest** in Congo.

Headquarted in Switzerland, **INTERHOLCO respects the highest technical** and **socio-environmental standards** for people, planet and climate.

Integrated supply efficient logistics

INTERHOLCO manages its **entire integrated value chain**, from sustainable forest management and industrial processing through to sales and product certification.

IHC INTERHOLCO

ENGINEERED
TO PERFORM

The innovative **COMBILIFT** system is designed for **fast, safe and efficient container loading.** Loads are positioned with **millimetre precision** and securely handled to prevent damage to the timber.

IHC

Finger-jointed, laminated timber is **durable, renewable, traceable and recyclable** - making it **an ideal material** for a **low-carbon circular economy.**

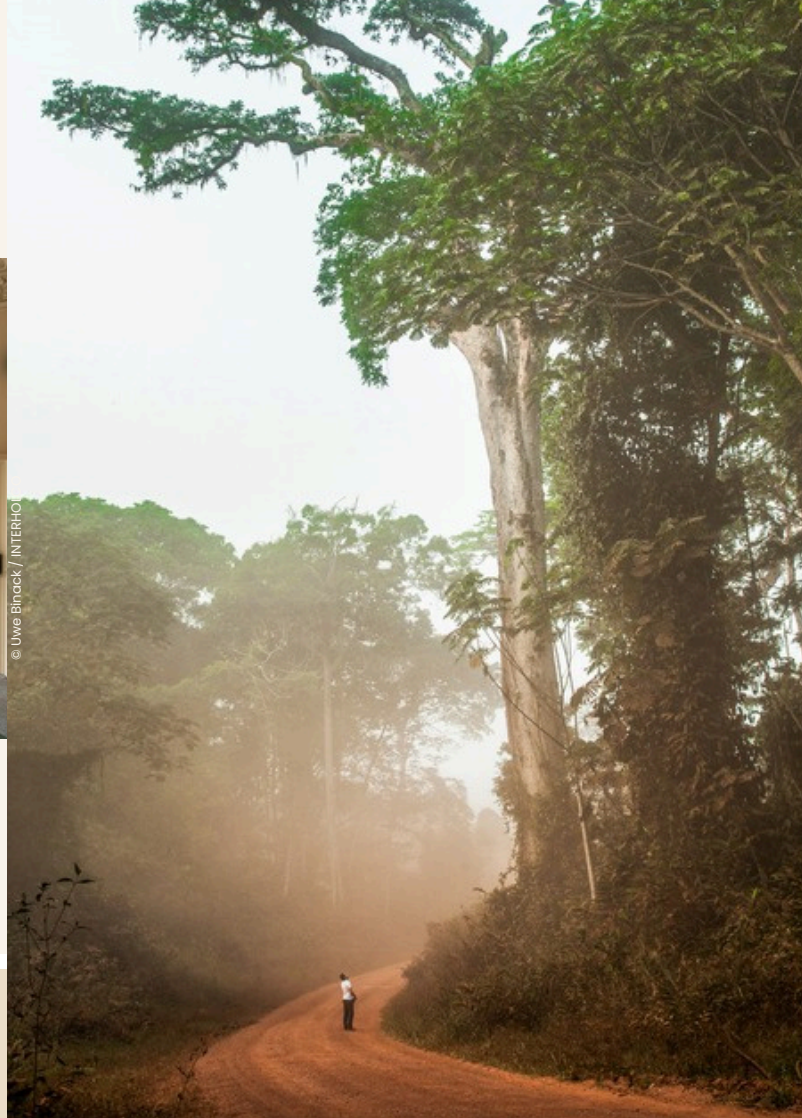

Our products create **social and environmental value** for the forests where we work and for customers around the world who choose **responsibly produced timber.**

The strength of African hardwoods

Above ▲ The lobby of **Made in Catherine** hotel (Brussels, Belgium), whose owner chose **Kosipo** (*Entandrophragma candollei*) to refurbish the windows. **Right** ▶ Our responsible approach is backed by recognised certifications, including **Forest Stewardship Council® (FSC® C022952)** and the **Programme for the Endorsement of Forest Certification (PEFC).**

FOUR CLEAR FACES

Natural defects are removed from our laminated timber through rigorous selection and precision machining.

Scan the QR code for the 'Environmental Product Declaration' (EPD) of our engineered wood products.

CUSTOM MACHINING

Our standard finger-jointed range comes in widths of 86, 96, 105, 125 and 145 mm. Other dimensions are available on request.
